Short description:

#3DBenchy is a 3D model specifically designed for testing and benchmarking 3D printers. It is a small recognizable object that you can download for free, make and share.

Description:

Description #3DBenchy is a 3D model specifically designed for testing and benchmarking 3D printers. It is a small recognisable object that you can download for free, make and share.
 It 3D-prints quickly and is a perfect tool for calibrating your 3D printer. There is a single-part STL file for 3D printing the boat in one material, and a multi-part STL file collection that can be used for multi-material/printhead 3D printing. You can visit <http://3DBenchy.com> for more information on how to use #3DBenchy.

 To learn more about dual-colour 3d printing visit <http://3dbenchy.com/?p=709>
